

Innorder OCC - Per-Customer Private Deployment

Customer Private Network / Docker Compose

Participant Workstations

Signed Electron App

browser authentication

Encrypted read-only cache

Customer OIDC

TLS / REST / SSE

Application Tier

AI Service

OCC Core

local policy decisions

Telemetry Collector

OPA Sidecar

Data Tier

S3 / MinIO

Kafka KRaft

PostgreSQL 16+
pgvector + btree_gist

Redis

governed TLS

Approved Model Endpoints

versioned object backup

encrypted backup

Backup Target

Pilot: single-node dependencies, no HA claim.
Production: customer SLA determines replicas, RPO and RTO.
